

The final positions of 74842, a 2011 juvenile birds from Langholm and 'McPedro', the adult bird tagged at Langholm in 2010 that overwintered in Spain 2010-2011 before returning to Scotland in 2011.

These signals from the tags were received in the last week of November 2011 and searches on the ground have not found tags or birds so their fate, alive or dead, cannot be established.
